Principal Technical Program Manager (TPM)

Own Strategy-To-Delivery Lifecycles Through Launch and Ongoing Operations

Lead technology strategy across solution and enterprise architecture with structured guidance. Navigate complex programs with steady alignment, engaging communication, and strong cross-team partnership. Move fluidly between technical design and executive level storytelling to drive impactful decisions. Blend commercial thinking, security first judgment, and AI-native practices to elevate delivery quality. Foster clarity, momentum, and trust across large, rapidly evolving initiatives.

Core Competencies

Solution and Enterprise Architecture | Technical Program Management | AI and Automation Strategy

Cloud Platform Delivery | Distributed Systems and API Architecture | Data Governance and Privacy

Product Roadmap and Strategy | Executive Stakeholder Alignment | Agile and SAFe Delivery

Engineering Velocity and Process Improvement | Telecom and BSS Domain | IoT Platform Design

Tools and Technologies

Architecture:	Solution and Enterprise Architecture (TOGAF), Cloud-Native, Microservices, API-first (REST, GraphQL), Event-Driven Design, Distributed Systems, Reliability Engineering, High-Availability, IoT (NB-IoT, MQTT, LwM2M), BSS platform design, E2E Design and Architecture.
Cloud and Data:	AWS, Azure, GCP; Snowflake, Databricks, Kafka, PostgreSQL, MongoDB, CI / CD, GitLab, GitHub Actions, Docker, Splunk, Power BI, Tableau, IAM
AI and Automation:	AI / LLM Integration (Claude, ChatGPT, Cursor), Claude Code; ML-based Automation, AI-powered Workflow Design.
Program Management:	Agile / SAFe / Scrum, Product Owner, Backlog Management, OKRs / KPIs, Risk and Dependency Management (RAID), PI Planning, Portfolio Management, Executive Reporting
Privacy and Compliance:	CCPA / GDPR / COPPA, Data Governance, Privacy-by-Design, Consent Management, IAM, Data Subject Request Workflows, Security-First Architecture
Tools:	JIRA / JiraAlign, Confluence, Sparx EA, MIRO, Lucidchart, MS Visio, Planview, MS Project, Postman, ServiceNow

Professional Experience

T-MOBILE USA, Bellevue, WA

2017 - Present

Group TPM and Principal Enterprise Architect

2022 - Present

Direct enterprise architecture and program delivery for privacy and customer data platform portfolio. Guide large-scale, compliance-driven transformation initiatives across 35+ cross-functional engineering, product, legal, and security teams to support 120M+ customer data estate.

- Co-founded Privacy Experience Services platform (PrES) from blank-sheet assessment of siloed workflows and directed architecture for a 12-engineer team, delivering 30% faster time-to-market, 15% lower Total Cost Ownership (TCO), and 65% fewer production incidents.
- Designed and shipped AI-powered operating model for DSR platform impacting end-to-end customer journeys, automating intelligent routing, ML-based identity resolution, and AI-driven validation, cutting operational costs 60% and eliminating significant manual overhead.
- Architected high-confidence customer identity resolution system across 120M+ subscriber base by integrating IAM, billing, profile, and third-party data using ML-based fuzzy scoring, enhancing data subject search rates 96% YoY and customer engagement 5X.

T-MOBILE USA (Continued)

- Launched \$15M+ privacy dashboard as Lead Architect and TPM, improving consent management, increasing customer opt-in 18%, and driving incremental ad revenue growth
- Led \$40M+ Project Genius portfolio as Lead Architect by managing 6 Senior Architects, shaping privacy product and platform roadmap, configuring overall technology strategy, and boosting cross-team delivery productivity 25%.

Senior Solution Architect and Principal TPM**2017 - 2022**

Guided enterprise architecture and TPM delivery for foundational platform and compliance transformation programs. Managed \$45M+ across concurrent initiatives spanning enterprise platform delivery, IoT product launch, and regulatory compliance infrastructure.

- Spearheaded \$25M+ CCPA compliance architecture and ECPC platform rollout as single-threaded TPM across 35+ business and IT units, converting fragmented compliance operations into a centralized, automated, and auditable platform.
- Delivered \$20M+ Sync Up Pets IoT product line as Lead TPM and Architect, owning product strategy, system architecture (NB-IoT, MQTT, LwM2M), and end-to-end go-to-market delivery with 30+ cross-functional stakeholders.
- Introduced iterative Agile delivery frameworks across 8+ product teams by establishing KPI governance, defining OKRs, and building executive dashboards that improved VP-level visibility into program health.

ERICSSON USA, Bellevue, WA**2014 - 2017****Senior Solution Architect and Development Manager**

Coordinated solution architecture and program delivery for U.S. Cellular billing and data platform transformation engagements.

- Secured \$10M+ U.S. Cellular engagement through architecture leadership by designing Switch2Bill integration to consolidate network switches, mediation, and billing platforms, reducing billing delays 66% and eliminating revenue leakage.
- Revitalized stagnant billing program by redesigning delivery processes and leading cross-functional team of 15+, improving defect resolution time 70%, and lifting team efficiency 40%.

Additional Relevant Experience**ERICSSON LUXEMBOURG, Luxembourg, EU****Solution Architect And Technical Consultant**

Led requirements, functional specification design, and end-to-end solution architecture on Amdocs BSS billing platform for P and T / LUXGSM and European carrier clients. Covered order management, customer profile, billing, and service-provisioning workflows.

ACCENTURE INC., Toronto, ON**Technical Lead and Billing Expert**

Directed architecture and delivery for TELUS Billing Transformation on Amdocs Enabler 6.0. Designed billing, rating, payments, and accounts receivable modules across large-scale BSS platform modernization in a complex, high-availability carrier environment.

AMDOCS DVCI, Pune, IN, and Helsinki, FI**Module Lead and Senior Developer**

Served as SME for Billing and Accounts Receivable (ARIC) in Amdocs Enabler BSS Platform. Wrote production code in C, Java, and Oracle PL / SQL to drive requirements, architecture, and delivery of billing transformation initiatives across global carrier clients in North America, Europe, and Asia.

Education and Certifications

- **Bachelor of Technology (B Tech)**, Information Technology - Indian Institute of Information Technology (IIIT-A), Allahabad, India
- CSPO / PM - SAFe Product Owner / Product Manager, Scaled Agile Inc
- Certified Scrum Master (CSM), Scrum Alliance
- Generative AI Professional, Oracle Inc
